Your advantages:

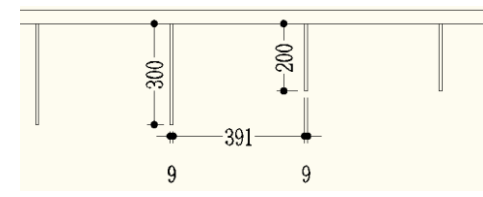

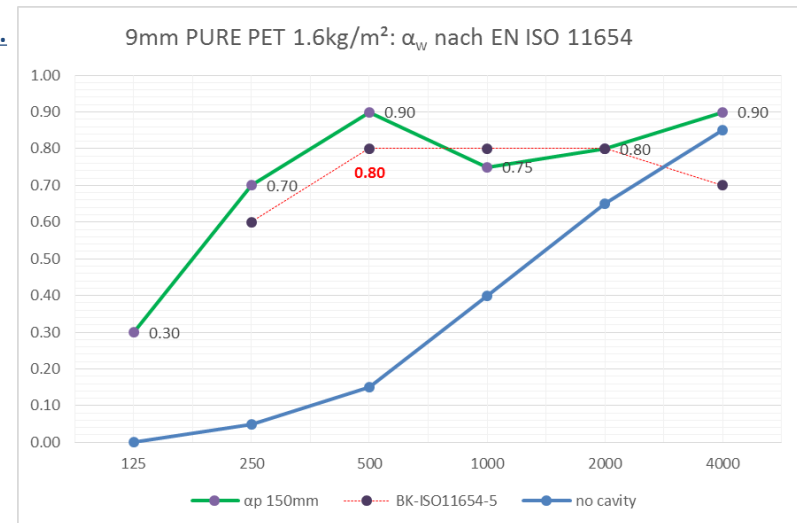

1. The baffle ceiling is in **ACOUSTIC TERMS HIGHLY EFFECTIVE**.
2. Compared to standard ceiling the acoustic effect is **50-80% higher**.
3. The baffle design additionally facilitates a **BETTER CLIMATE AND AIR CIRCULATION**.
4. Compared to standard ceilings, the baffle ceiling offers **MORE ACOUSTIC and BETTER CLIMATE**.
5. Additionally the **baffle ceiling is perceived as open ceiling**. The room height is perceived as high as to the top of the concrete ceiling.
6. Compared to standard completely concealed ceilings **the perception of room's height is higher**.
7. **NO emission** E0 (NO VOC)

Maintenance:

1. The Acoustic fiber panels are water resistant
2. **Easy to clean** like textiles .. e.g. with steam cleaner
3. Easy to replace

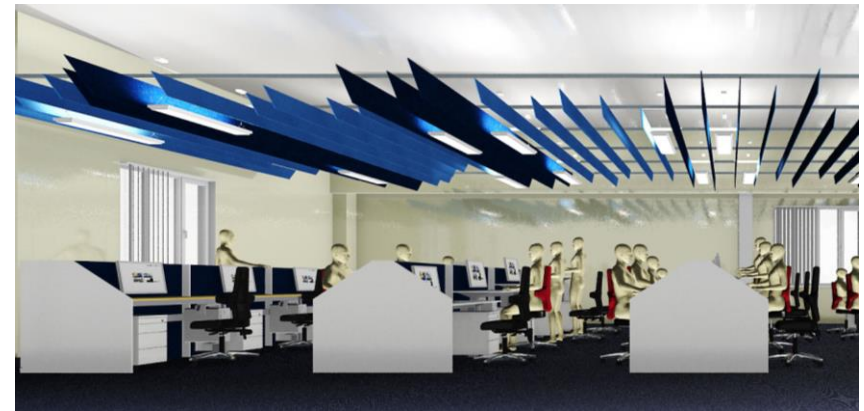

Installation:

1. Easy changes on site e.g. cutouts for air-condition.
2. Installation shall be together with installation of lights and air-conditions.
3. The baffle rail is installed one by one on ground first and then lifted up to the supporting rails.

- Light ceiling:**
1. Ceiling is painted in white
 2. And illuminated

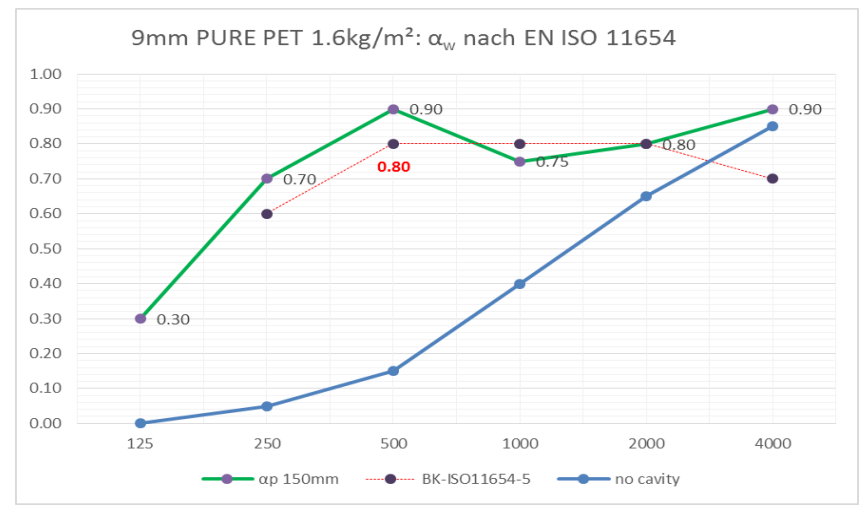

Acoustic is bad

Acoustic is good

- Dark ceiling:**
1. Ceiling painted in black

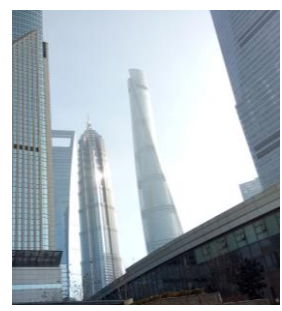

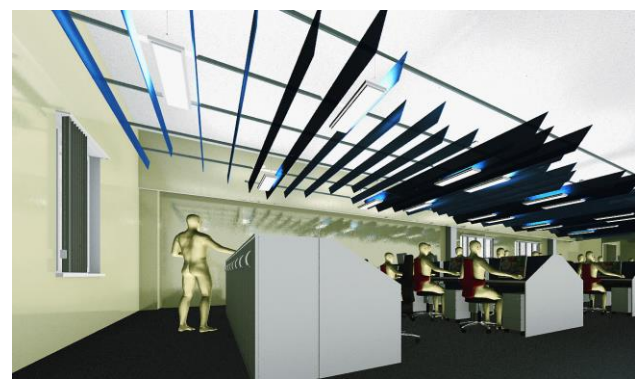

Open view to high room

Protected shelter

Both combined

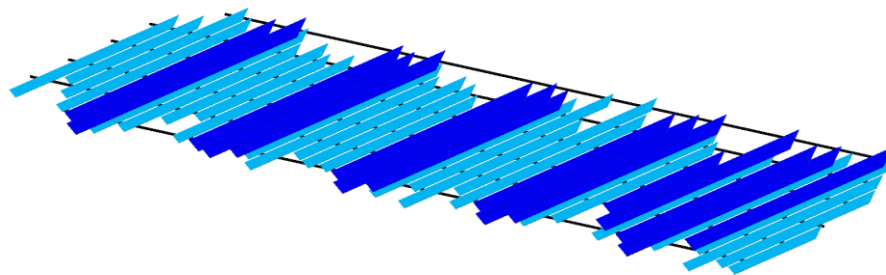

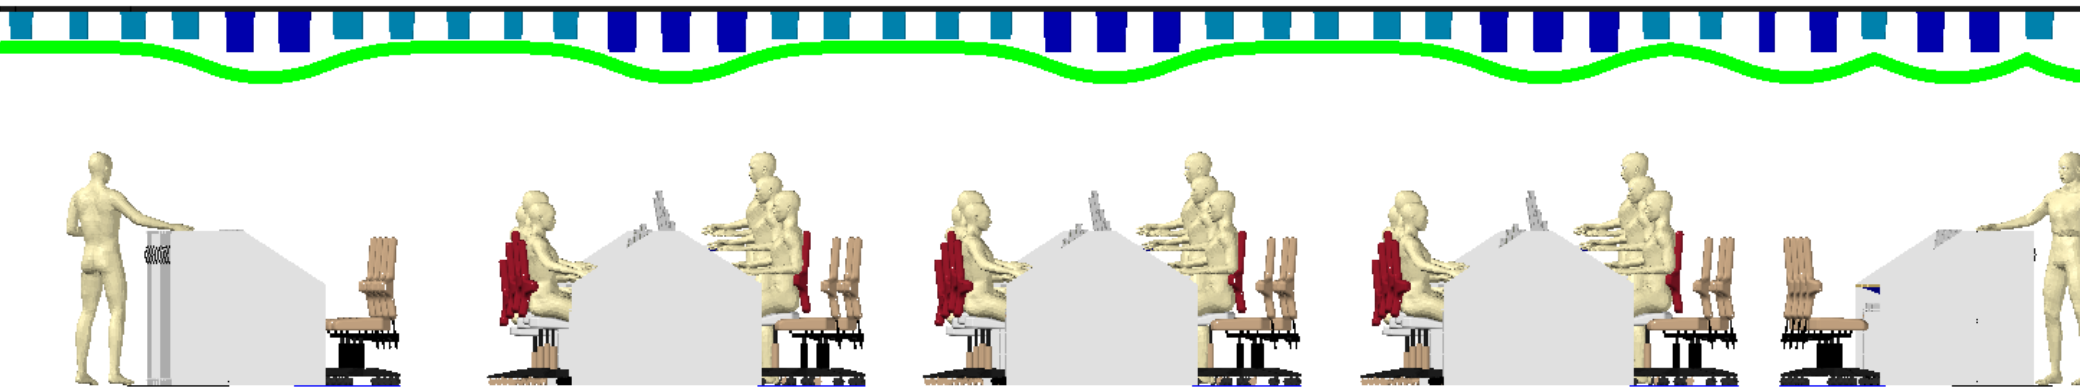

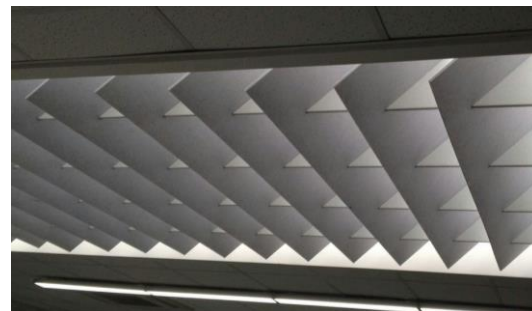

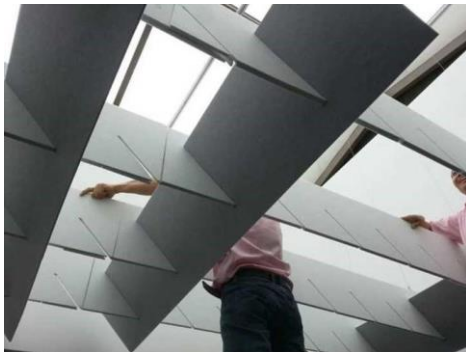

Feel good -> Blue sky
Blue -> Light blue -> White
